

/articles

GET /articles/{slug}

Get an article by slug

Path Parameters

Name	Type	Description
slug	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

- 200: Article retrieved successfully
- 404: Article not found

/articles

PUT /articles/{slug}

Update an article

Path Parameters

Name	Type	Description
slug	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
title	String	The title of the article. Default is an empty string.
body	String	The body content of the article. Default is an empty string.
description	String	A short description or summary of the article. Default is an empty string.

Request Example

```
{
  "article": {
    "title": "string",
    "body": "string",
    "description": "string"
  }
}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

/articles

DELETE /articles/{slug}

Delete an article

Path Parameters

Name	Type	Description
slug	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

- 204: Article deleted successfully
- 403: Not authorized to delete the article
- 404: Article not found

/articles/{slug}

POST /articles/{slug}/favorite

Favorite an article

Path Parameters

Name	Type	Description
slug	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

Status Code	Description
200	Article favorited successfully
401	Unauthorized - authentication is required
404	Article not found
500	Internal server error

/articles/{slug}

DELETE /articles/{slug}/favorite

Unfavorite an article

Path Parameters

Name	Type	Description
slug	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

- 200: Article unfavorited successfully
- 401: Unauthorized - authentication is required
- 404: Article not found
- 500: Internal server error

/articles

POST /articles

Create an article

Path Parameters

None

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
title	String	The title of the article. This field is required and must not be blank.
description	String	A short description or summary of the article. This field is required and must not be blank.
body	String	The main content or body of the article. This field is required and must not be blank.
tagList	List<String>	A list of tags associated with the article. This field is optional and may be null or empty.

Request Example

```
{
  "article": {
    "title": "string",
    "description": "string",
    "body": "string",
    "tagList": []
  }
}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

/articles

GET /articles/feed

Get user feed

Path Parameters

None

Query Parameters

Name	Type	Description
offset	int	Query parameter evidenced in controller signature
limit	int	Query parameter evidenced in controller signature

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

- 200: Feed retrieved successfully
- 401: Unauthorized

/articles

GET /articles

Get articles

Path Parameters

None

Query Parameters

Name	Type	Description
offset	int	Query parameter evidenced in controller signature (defaultValue = "0")
limit	int	Query parameter evidenced in controller signature (defaultValue = "20")
tag	String	Query parameter evidenced in controller signature (required = false)
favorited	String	Query parameter evidenced in controller signature (required = false)
author	String	Query parameter evidenced in controller signature (required = false)

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

Status Code	Description
200	Articles retrieved successfully

/articles/{slug}

POST /articles/{slug}/comments

Create a new comment for an article

Path Parameters

Name	Type	Description
slug	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

Status Code	Description
201	Comment created
401	Unauthorized
404	Article not found
422	Validation error

/articles/{slug}

GET /articles/{slug}/comments

Get comments for an article

Path Parameters

Name	Type	Description
slug	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
comments	[]	List of comments returned

Response Example

```
{  
  "comments": []  
}
```

Documented Responses

- 200: List of comments returned
- 401: Unauthorized
- 404: Article not found

/articles/{slug}/comments

DELETE /articles/{slug}/comments/{id}

Delete a comment from an article

Path Parameters

Name	Type	Description
slug	String	Path parameter evidenced in controller signature
id	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

HTTP Code	Description
204	Comment deleted
401	Unauthorized
403	Forbidden

/user

GET /user

Get current user

Path Parameters

None

Query Parameters

None

Header Parameters

Name	Type	Description
Authorization	String	Evidenced header parameter in controller signature

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

/user

PUT /user

Update current user's profile

Path Parameters

None

Query Parameters

None

Header Parameters

Name	Type	Description
Authorization	String	Header parameter evidenced in controller signature

Request Body Structure

Field	Type	Description
user.email	String	The user's email address. Defaults to an empty string when not provided. This field is validated to conform to an email format.
user.password	String	The user's password. Defaults to an empty string when not provided.
user.username	String	The user's username. Defaults to an empty string when not provided.
user.bio	String	The user's biography or profile description. Defaults to an empty string when not provided.
user.image	String	The URL or reference to the user's profile image. Defaults to an empty string when not provided.

Request Example

```
{
  "user": {
    "email": "string",
    "password": "string",
    "username": "string",
    "bio": "string",
    "image": "string"
  }
}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

HTTP Code	Description
200	OK
400	Bad Request - validation failed
401	Unauthorized
404	User not found

/profiles

GET /profiles/{username}

Get profile by username

Path Parameters

Name	Type	Description
username	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

- 200: Profile retrieved successfully
- 404: Profile not found

/profiles/{username}

POST /profiles/{username}/follow

Follow user

Path Parameters

Name	Type	Description
username	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

--	--

Status Code	Description
200	Followed user successfully
404	Target user not found

/profiles/{username}

DELETE /profiles/{username}/follow

Unfollow user

Path Parameters

Name	Type	Description
username	String	Path parameter evidenced in controller signature

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
Not evidenced	Unknown	No explicit response payload structure detected

Response Example

```
{}
```

Documented Responses

Status Code	Description

200	Unfollowed user successfully
404	Target user or follow relation not found

/tags

GET /tags

Get all tags

Path Parameters

None

Query Parameters

None

Header Parameters

None

Request Body Structure

Field	Type	Description
Not evidenced	Unknown	No explicit request payload structure detected

Request Example

```
{}
```

Response Structure

Field	Type	Description
tags	[]	Field evidenced in controller response map

Response Example

```
{  
  "tags": []  
}
```

Documented Responses

Status Code	Description
200	OK
500	Internal Server Error
